

NEWS ANNOUNCEMENT

Model AB Ball Vibrators – Small Package, Heavy Hitter

For more information contact Sue Griffith at 800-262-2106 or sue@cougarindustries.com

Peru, IL – Cougar Industries, Inc. is pleased to announce that its Model AB line of Ball type industrial vibrators produces the highest ratio of force to physical weight in the industry! These small lightweight industrial grade pneumatic vibrators pack a powerful punch with force ratings over 1000lbs for some units to solve your material flow problems.

The AB line of Ball vibrators includes three mounting and port configurations; the Model ABF, ABU and ABL, thereby providing application flexibility. The AB line of vibrators has only one moving part, a chrome steel ball that rotates on hardened steel races. In addition, the AB Ball vibrators are rugged and are designed for continuous duty. The AB vibrators are interchangeable with other manufacturers units. These units can be used within a wide range of industrial applications where you need to promote material flow, compact, feed or loosen for any reason.

Cougar Industries, Inc. is a pioneer of vibration technology and has been providing material flow-aids for decades, offering cost-effective solutions, expert technical assistance and complete service and support. For more information please contact us at 800-262-2106, email us at cougar@cougarindustries.com or visit our website at www.cougarindustries.com
